

Week 5

Rohan

Role: Scrum Master

What have I done this week?

- Moved priority tasks from the backlog to the sprint backlog
- Reviewed code submissions: Password security
- Held the scrum meeting to review the weeks work and priorities for the next week

What problems have I encountered?

1. Reviewing the code I had a question for the scrum team regarding one of the methods being created, but not called in another class.
2. I also found the technical aspects of another scrum team members code hard to understand.

Have I solved them and how?

For problem 1, I commented on the code submitted for review, asking for clarification. Clarification was given by the Scrum Team, thus resolving the issue, and enabling me to approve the pull request.

For problem 2, a more technically experienced member of the team was able to review the code and provide troubleshooting feedback to the scrum team member who wrote the code. This highlighted the importance of working in a team to understand and work to peoples strengths, and spread and interchange resource where possible and required.

Lukas

Role: Scrum Team

What have I done this week? Move money between accounts feature.

What problems have I encountered? None.

Have I solved them and how? Doesn't apply

Charlotte

Role: Scrum Team

What challenges did you encounter in your new role this week?

This week I was again a Scrum Team member. My main challenge this week was finding the time to dedicate to the work, as I work full time and am currently moving home. I do however believe that this would not impact a real Scrum team performing duties during working hours, and therefore will not be listing it as a proper challenge.

How might you overcome these challenges in future projects?

N/A

Is there anything you wish you had done differently?

N/A

Christina

Role: Product Owner

What have I done this week? Added a task, that was immediately prioritised by the Scrum Master and put in the sprint. The system shall verify the credentials of the customer and only allow access for verified customers.

What problems have I encountered? Not a lot of problems this week, as the team did not have queries.

Have I solved them and how? n/a
